PRESS RELEASE

GURNEY ENVIRONMENTAL LTD is pleased to announce the availability of EPT Waste-to-Energy Systems for UK industrial customers utilising anaerobic digesters with biogas recovery and energy generation systems. This new offering is a result of a recently established collaboration between Gurney Environmental and the Israeli company ENVIRONMENTAL PROTECTION TECHNOLOGIES LTD. (EPT).

Environmental Protection Technologies Ltd. was founded in 1989 with the prime objective of initiating and executing projects in the fields of water and wastewater treatment, including water recycling and reuse. EPT is staffed by experienced engineers, chemists, biologists, technicians and plant operators with offices located in Tel Aviv, Israel.

EPT has, over the past 20 years, specialised in the design, construction, commissioning, operation and maintenance of full scale Anaerobic Digester plants located in Israel and Spain. Currently EPT supervises, operates and maintains over 30 water and wastewater treatment plants serving a wide spectrum of industries, such as food and beverages, chemical, petrochemical, pulp and paper production, dairies and pharmaceutical.

Gurney Environmental is dedicated to providing its customers with time proven sustainable solutions to water and wastewater treatment problems. Staffed by seasoned professionals from process, operations and project management, Gurney Environmental is delighted to be able to add the EPT Waste-to-Energy system to its growing portfolio.

Gurney Environmental and EPT share a common approach in offering sustainable, comprehensive solutions to complex environmental problems with respect to water and wastewater treatment. With EPT's long term expertise and experience providing Anaerobic Digesters to the industrial sector, Gurney Environmental, in collaboration with EPT, is now able to offer the UK Industrial sector a very experienced team capable of providing a design-build service for Anaerobic Digesters with biogas recovery and energy generation.
